P'RADIKUS CONFLICT

I. INTRODUCTION - Empire of Destruction.

Many years ago the planet P'radikus was visited by a peaceful, highly advanced race of people known as the Lextorians. What they encountered when exiting their starship forever changed the course of history for the entire galaxy. P'radikus was inhabited by numerous uncivilized tribes constantly at war with one another. Endless combats had kept them from any technological advancement for thousands of years. Since the Lextorians believed only in peace and not war, they refused to put up a fight and were soon exterminated.

Although the natives of P'radikus were warlike and uncivilized, in time they figured out how to fly the starship and began to expand their war throughout the galaxy. They brutally attacked and plundered every world they came in contact with. Through violence and enslavement they were able to steal some of the most advanced technology in the galaxy.

III. GAME PLAY

Like wild fire, the P'Radikus empire continued to spread and it is only a matter of time before they reach our world. Facing this impending encounter, the elders have been training you since childhood for only one specific task: rid the galaxy of the P'radikus dominance once and for all. With your mental and physical skills honed to perfection, you and your starship are now as one. YOU must attack their many outposts and destroy their home planet. It is up to you!

Your main computer is in constant communication with the Crystalline computers of Telestron. From Telestron's master information network you will receive instructions for your various missions.

III. GAME PLAY (Continued)

On each mission you will be fighting many enemy craft and earn credits for destroying them. If you survive these challenges, you will have a chance to destroy their outposts on the planets.

After a successful mission you will discover useful objects and clues to help you continue your quest. You will also receive credits from thankful alien groups for freeing them. With these funds you will be able to purchase items needed to defeat the empire. Only by locating the sophisticated TOSON DRIVE can your ship have the warping ability to reach P'Radikus. Many have tried to destroy P'Radikus... it is said that only the weapon known as the THUNDERBOLT will be able to penetrate its planetary defense shields.
